Icon Guide

Made in Britain
Products have been made in Britain and adhere to the requirements of the 'Made in Britain' scheme.

Water Pressure
LP1 - 0.1 bar minimum
LP2 - 0.2 bar minimum
MP - 0.5 bar minimum
HP1 - 1 bar minimum
HP2 - 2 bar minimum

Guarantee
We offer a 10-year guarantee, unless otherwise stated, against manufacturing defects on all products when used in normal domestic applications (excluding serviceable parts, neglect or abuse). Additionally, we guarantee the surface finishing for ten years on chrome, unless otherwise stated.

EasyFit
Our enclosures feature EasyFit design, making them quick & simple to install.

Anti Scald
Thermostatic cartridges ensure that the tap or shower will not exceed a safe temperature, giving protection against accidental scalding.

Audio USB Port
Bring the sound of music to your bathroom with the Portal mirror with USB port and speakers.

Innovation
These products represent the latest in design to bring your bathroom right up to date.

100% Recyclable
Our Pioneer shower valve is manufactured from high grade engineered polymer which can be completely recycled.

Maintain with Easy Access
Our Universal Access concealed cistern has an access panel at the front, meaning it can be repaired or maintained simply by removing the front panel of the back to wall unit.

Bulb Information
This symbol displays the bulb type required should you need to replace the bulb in your mirror.

Safety Glass
Our mirrors and cabinets have film backed glass for added safety.

Shower Shield
Our wetrooms and enclosures have a transparent easyclean coating which repels water and limescale.

Eternalite
The Eternalite finish is available on our baths and ensures a rigid, super-strong bath which retains heat for up to 30 minutes longer than a standard bath.

WRAS
Appropriate products have been extensively tested by the WRc and are approved or pending approval to comply with the Water Regulations Advisory Scheme.

TMV2
The Government recommends the use of thermostatic mixing valves (TMVs) for baths, taps and showers for all housing. TMV2 Certified valves maintain the pre-set temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding.

TMV3
TMV3 valves are engineered to a high standard so that they meet Government Health and Safety requirements for use in public places such as schools, hospitals, offices etc. and would significantly reduce the risk of scalds occurring in the home or anywhere that hot water is delivered through mixing valves.

Ultra. Your home for Showers for over 30 years.

Our huge range of showers is second-to-none, with unbeatable quality, a 10-year guarantee and an unrivalled collection of matching taps and accessories to complete your dream bathroom.

Why choose an Ultra Shower?

Safety First

Your safety is important to us, which is why the majority of our showers are thermostatic, to safeguard against accidental scalding. All our concealed twin, triple and dual control showers are also TMV approved – meaning they have been tested to the highest industry standards to provide safe showering for all the family.

Direct From Us to You

We are proud to manufacture our thermostatic twin and triple showers at our site in Burnley, Lancashire - using the patented Valquest cartridge to create a shower you can depend on. There are no middle-men, our dedicated team manufacture the showers here in Britain, ready to ship straight to you.

Peace of Mind

Our showers are tested to stringent quality standards, so we are confident of their ability to last, enabling us to offer a market-leading 10 year guarantee*. Our state-of-the-art testing facilities enable us to test the endurance and performance of our showers to ensure they comply with industry standards.

Co-ordinating Taps

Our ability to offer complete co-ordination for your bathroom gives you the opportunity to tailor your chosen look with matching taps to suit your shower. You'll also find complementary furniture, mirrors and radiators to complete your bathroom.

Innovation

At Ultra we are dedicated to bringing you the latest designs using up-to-date technology. The new product design team benefits from a design process audited to ISO9001 standards, meaning each product is designed, sourced, evaluated and warehoused to the highest standard.

Water Saving Showers

At Ultra we are committed to helping our customers to be more water efficient. To reduce the amount of water your shower uses, opt for our water-saving slide rail kit, which uses air induction technology to reduce water usage by up to 25%. Alternatively, you can fit one of our 'eco-flow' regulators to any shower hose, to limit the flow of water to 6 litres per minute.

*Unless otherwise stated. See page 3 for guarantee details.

VALQUEST

The power behind your shower.

LOOK out for these symbols

There are lots of reasons to choose an Ultra thermostatic shower - safety, contemporary design, co-ordinating taps and a market-leading 10-year guarantee*.

Even better, our shower valves are also great for your installer, meaning less time and therefore less cost to you! By installing one of our shower valves, you can enjoy the following benefits:

Made In Britain

Our twin, triple and dual control showers are manufactured in Burnley by a dedicated team. We are proud to be members of the Made in Britain scheme – look out for the 'Made in Britain' logo on all relevant showers.

Industry Certified

Our concealed twin, triple and dual control showers are **TMV** approved.

TMV2 approval means the shower will maintain the pre-set temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding. **TMV3** approval means that the shower meets Government health & safety requirements for use in public places such as schools, hospitals etc. Together, they ensure that our showers offer peace of mind and safe showering for all the family.

Safety for all the family

- Thermostatic control to +/- 2-3 degrees even if the temperature or incoming pressures fluctuate
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- In the event of hot or cold water failure, the valve will shut down the water supply

Reliability

- Accurate flow control
- Excellent flow rates – even at low pressure. Ultra showers can deliver 5.5 litres of water per minute at 0.1 bar pressure
- The patented Valquest cartridge is highly resistant to calcium build-up – even in hard water areas

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- Thermostatic control to +/- 1 degree even if the temperature or incoming pressures fluctuate

See page 3 for guarantee details.

Step 1

How to choose the perfect shower.

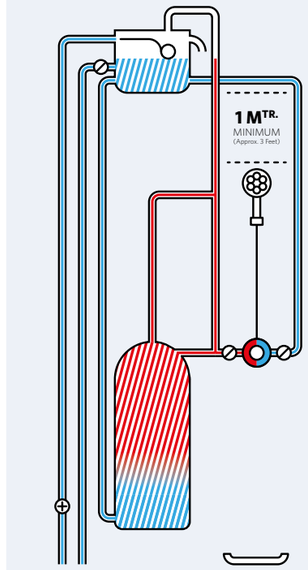
When deciding what style of shower you require, you need to determine the type of water heating system you have in your home. You should ensure that your system has adequate pressure to operate the shower you choose.

This will affect your choice of shower and the shower's performance. To identify the type of system you have installed, there is a guide outlined here. You could also ask a qualified installer or call our customer service department on 01282 446789. This will ensure you pick the correct shower and enjoy your showering experience to its full potential.

Water Pressure Guide:

- LP1 0.1 bar minimum
- LP2 0.2 bar minimum
- MP 0.5 bar minimum
- HP1 1.0 bar minimum
- HP2 2.0 bar minimum

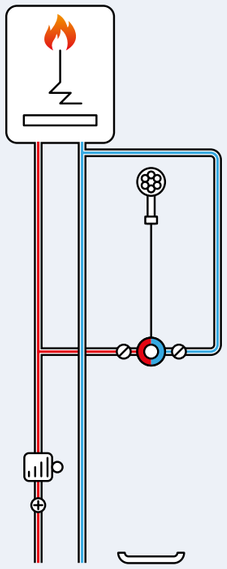
Gravity-Fed System
Low Pressure



If you have a cold water tank in your loft and hot water cyclinder (usually found in your airing cupboard) then you have a gravity fed system.

Recommended For:
Suitable for all of our LP1 and LP2 combinations. For all our MP and HP combinations, you may need to use a suitable shower pump to give the required pressure for optimum performance.

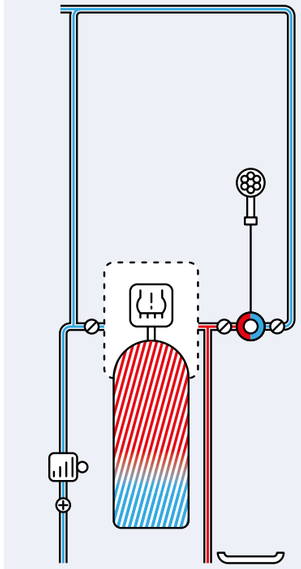
Mains System
High Pressure



If you have a combination boiler or instantaneous gas water heater (multipoint heater) then you have a high pressure mains system.

Recommended For:
Suitable for all of our shower systems.

Unvented System
High Pressure



If your hot water is stored under pressure in a cyclinder (usually situated in your airing cupboard or garage) you have a high pressure unvented system.

Recommended For:
Suitable for all of our shower systems.

Step 2

What type of shower would you like?

Thermostatic Mixer Showers

Twin Concealed

Separate controls for temperature and flow.

Operates one shower accessory: fixed head or slide rail kit.

Pioneer Twin Concealed

Separate controls for temperature and flow.

Operates one shower accessory: fixed head or slide rail kit.

Twin Concealed with Diverter

Separate controls for temperature and flow.

Diverts between two shower accessories: fixed head/slide rail kit, fixed head/body jets or slide rail kit/body jets.

Pioneer Twin Concealed with Diverter

Separate controls for temperature and flow.

Diverts between two shower accessories: fixed head/slide rail kit, fixed head/body jets or slide rail kit/body jets.

Triple Concealed

Separate controls for temperature and flow.

Operates two shower accessories separately or simultaneously: fixed head & slide rail kit, fixed head & body jets or slide rail kit & body jets.

Triple Concealed with Diverter

Separate controls for flow and temperature.

Operates 3 shower accessories separately or two simultaneously: fixed head, slide rail kit and body jets or fixed head, slide rail kit and bath spout.

Dual Concealed

Separate controls for temperature and flow.

Operates one shower accessory: fixed head or slide rail kit.

Sequential Concealed

One control for temperature and flow.

Operates one shower accessory: fixed head or slide rail kit.

Exposed Thermostatic Bar Showers

Separate controls for temperature and flow

Operates one shower accessory: slide rail kit on bottom outlet options or rigid riser kit on top outlet options.

Twin Exposed

Separate controls for temperature and flow.

Operates one shower accessory: rigid riser kit.

Manual Mixer Showers

Triple Exposed

Separate controls for temperature and flow.

Operates a rigid riser kit with overhead shower and hand shower.

Dual Exposed

Separate controls for temperature and flow.

Operates one shower accessory: rigid riser kit or slide rail kit.

Sequential Exposed

One control for temperature and flow.

Operates one shower accessory: slide rail kit or rigid riser kit.

Manual Concealed

One control for temperature and flow.

Operates one shower accessory: fixed head or slide rail kit.

Manual Exposed

One control for temperature and flow.

Operates one shower accessory: slide rail kit.

Electric Showers

Electric Showers

One control for temperature and flow, with an on/off button

Includes slide rail kit with multifunction handset.

Thermostatic Shower Panels

Shower Panels

Separate controls for temperature and flow.

Includes overhead shower, hand shower and body jets.

Commercial Showers

Commercial Showers

Our range of commercial showers is ideal for use in gyms, schools and leisure centres.

Water Saving Showers

Water Saving Showers

Reduce water usage with our water-saving slide rail kit, which uses up to 35% less water or use a flow restrictor to limit the flow to 6 litres per minute. See pages 19, 31 and 41 for more details.

Twin Concealed Showers

A twin concealed shower offers a simple shower solution with a neat finish and is suitable for use with all water systems.

Pipework is concealed for a minimalist look – choose from a variety of round and square contemporary designs or keep it classic with a traditional shower.

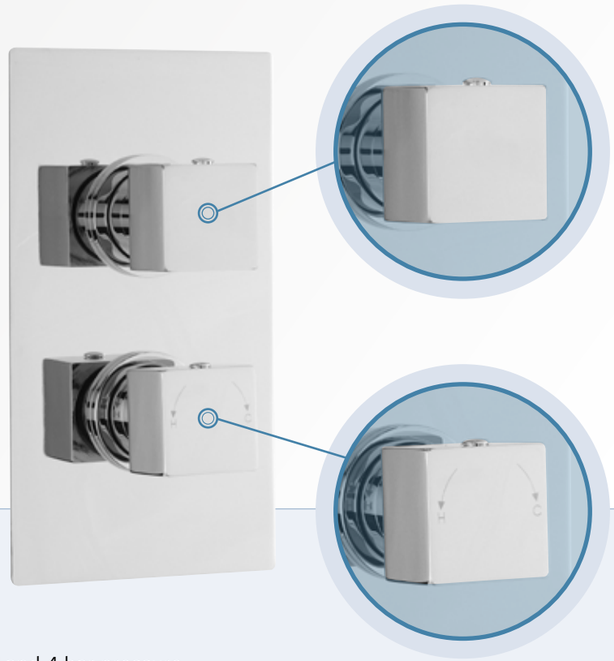
Why Choose a Twin Concealed Shower?

- Easy to operate – the top control turns the water on and off and the bottom control adjusts the temperature.
- A simple shower solution – the twin shower will operate one shower accessory, choose a fixed head or slide rail kit.
- Protection against accidental scalding.
- Made in Britain and TMV2/ TMV3 approved – ensuring it has been tested to the highest standards.

On. Off. Easy!



Hot. Cold. Mix it up and make it just right for you...

Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure.
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- Thermostatic control to +/- 1 degree even if the temperature or incoming pressures fluctuate

pioneer

Tomorrow's shower technology today

Introducing a new concept in showering from Ultra - the Pioneer Valve is injection moulded from a high grade engineering polymer, using WRAS approved materials.

Innovative

A first in the market, with a state-of-the art patented design

Indestructible

Pioneer is highly resistant to calcium build up, can withstand pressures of up to 25 bar and is temperature resistant up to 85 degrees.

Dependable

We offer a lifetime guarantee* on the main Pioneer shower valve body against faulty material or manufacturing defects.

Safe

Partnered with the proven patented technology of the Valquest thermostatic cartridge.

Environmentally Friendly

The Pioneer Valve is 100% recyclable and manufactured in the UK, reducing its environmental footprint.

Future Proof Polymers

Engineering polymers are quickly becoming the material of choice in global aerospace applications. These materials are able to maintain their exceptional properties even when exposed to elevated temperatures and aggressive fuels. Typically, an engineering polymer is chosen for its range of enhanced physical properties and can replace traditional engineering metals such as, aluminium, Mazak, brass and some steels. Other properties exhibited by various grades of engineering polymers include high heat resistance, mechanical strength and rigidity etc.

* Products must have been installed and commissioned fully in line with manufacturers' fitting instructions. The product must be used in a normal domestic application. Guarantee excludes serviceable parts, neglect or misuse, as well as any consequential loss.

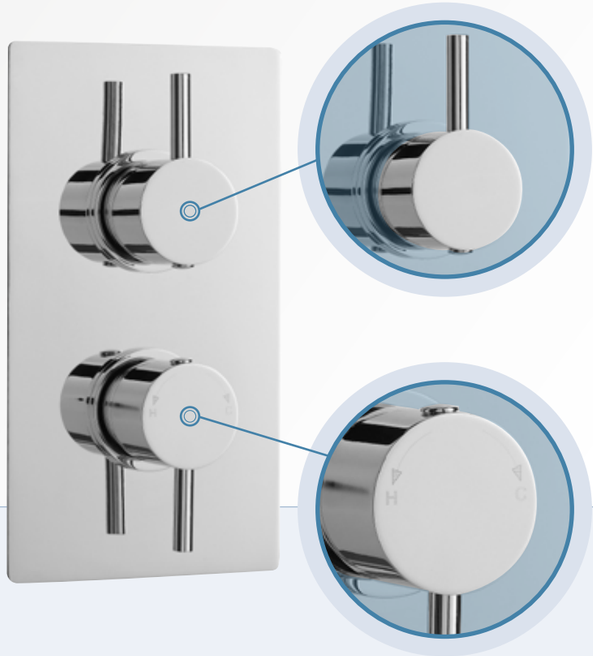
Why Choose a Twin Concealed Shower with Diverter?

- Easy to operate – the top control is the diverter to switch between your shower accessories and the bottom control adjusts the temperature.
- A flexible shower solution – the twin with diverter shower allows you to have two shower accessories, and diverts between them according to your preference.
- Protection against accidental scalding.
- Made in Britain.

To the left or to the right... which accessory will you choose today?



Hot. Cold. Mix it up and make it just right for you...

Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure.
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- Thermostatic control to +/- 1 degree even if the temperature or incoming pressures fluctuate

Triple Concealed Showers

A triple concealed shower offers multi-option showering for complete flexibility and is suitable for use with all water systems.

Pipework is concealed for a minimalist look – choose from a variety of round and square contemporary designs or keep it classic with a traditional shower.

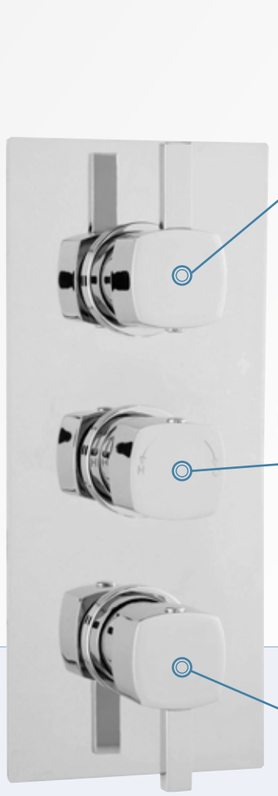
Ultra Thin Fixed Head
MP **HEAD47 £262.00**

Square Body Jet
A354 **£43.40** (each)

See Page 40

Why Choose a Triple Concealed Shower?

- Easy to operate – the top control operates one shower accessory, the centre control adjusts the temperature and the bottom control operates the other shower accessory.
- A flexible shower solution – the triple shower will operate two shower accessories, you can choose to run them separately or both at the same time.
- Protection against accidental scalding.
- Made in Britain and TMV2/TMV3 approved – ensuring it has been tested to the highest standards.



Turn on one accessory.

Hot. Cold. Mix it up and make it just right for you...

Turn on a second accessory.

Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure.
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- Thermostatic control to +/- 1 degree even if the temperature or incoming pressures fluctuate

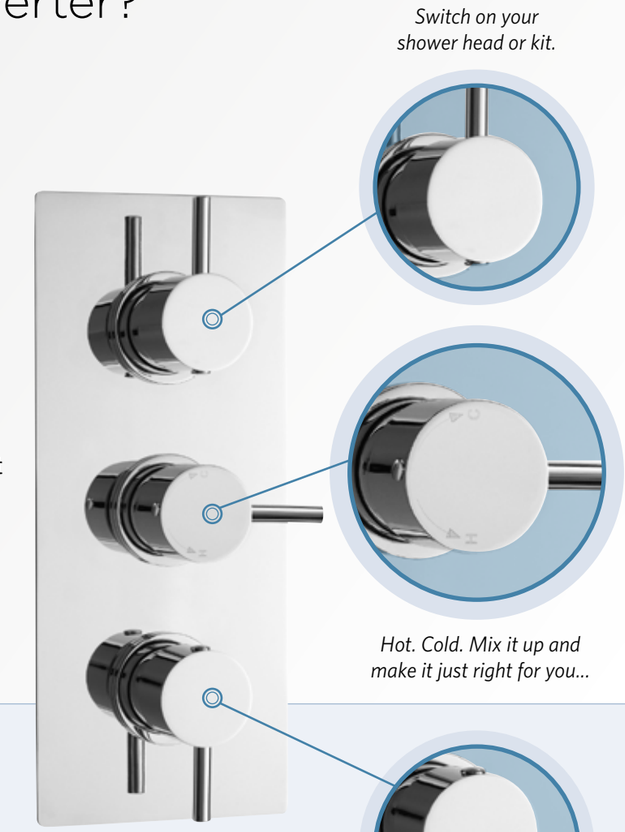
See Page 48

Why Choose a Triple Concealed Shower with Diverter?

- Easy to operate – the top control diverts between two shower accessories, the centre control adjusts the temperature and the bottom control operates a shower accessory – enabling you to have three shower options.
- A flexible shower solution – the triple with diverter shower will operate three shower accessories, you can choose to run them separately or run two at the same time.
- Protection against accidental scalding.
- Made in Britain.



Switch on your shower head or kit.
Hot. Cold. Mix it up and make it just right for you...
Bring on the luxury with a third shower accessory.

Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure.
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas

Exposed Thermostatic Bar Showers

An exposed bar shower is a popular choice and is suitable for use with all water systems.

Choose from a variety of styles, with slimline, round and square designs available.

Featured

Quadro Thermostatic Bar Valve (top outlet)
LP2 A3502 **£199.00**

Telescopic Kit 2 with Diverter
HP1 A3114 **£283.00**

See Page 67

Why Choose an Exposed Bar Shower?

- Easy to operate – the left handle controls the water flow and the right handle adjusts the temperature.
- A simple shower solution – the bar shower will operate one shower accessory. For bottom outlet bar showers choose a slide rail kit, for top outlet bar showers choose a rigid riser kit.
- Protection against accidental scalding.

Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure (depending on model chosen).
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy, with Fast-Fit Brackets

1

Look for diagonal fixing points that will reduce the risk of piercing the pipework.

2

Slotted fixing points will ensure a degree of adjustment can be made. Look for secondary, round fixing points that will allow you to securely fix the valve once you are happy with the positioning.

3

Our Fast-Fit Bracket has chunky spanner flats - making it easy to get a grip - whilst avoiding the need to tighten against the fixing screws which could damage tiles.

4

Install the cover plates to conceal the threads between the bar valve and the mounting for a professional finish.

Twin Exposed Showers

A twin exposed shower offers a simple shower solution with exposed pipework in a high quality chrome finish and is suitable for use with all water systems.

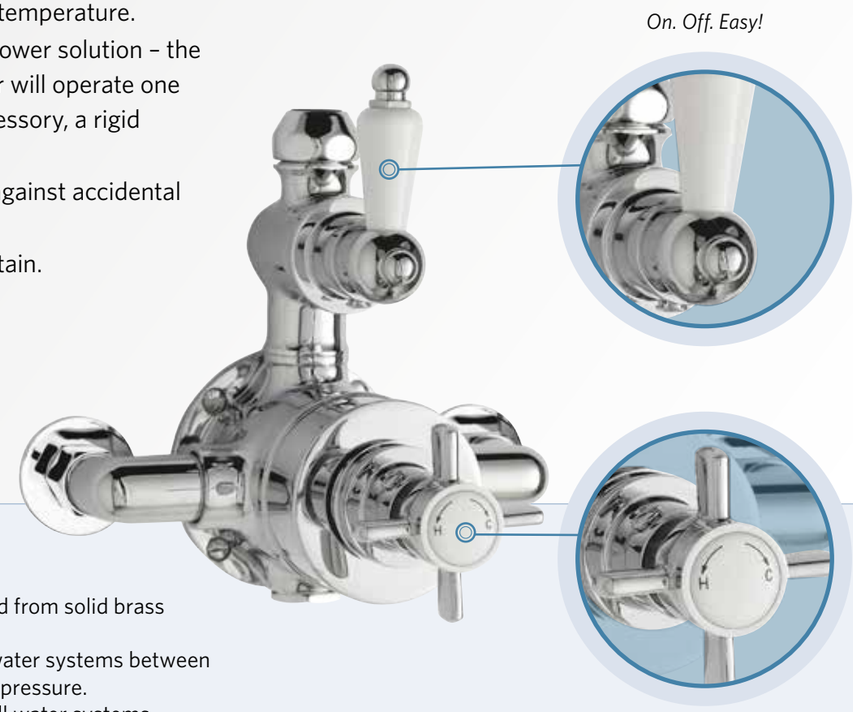
This classic shower option offers timeless elegance for any bathroom.

Featured

Twin Exposed Thermostatic Shower Valve
MP **A3056 £251.00**
Rigid Riser Kit with Diverter
MP **AM318 £405.00**
See Page 70

Why Choose a Twin Exposed Shower?

- Easy to operate – the lever control turns the water on and off and the crosshead control adjusts the temperature.
- A simple shower solution – the twin shower will operate one shower accessory, a rigid riser kit.
- Protection against accidental scalding.
- Made in Britain.



Features

- Manufactured from solid brass for durability.
- Suitable for water systems between 0.1 and 4 bar pressure.
- Suitable for all water systems.
- Thermostatically controlled.
- Built-in anti-scald device.
- Suitable for use with shower pumps.
- 10 year guarantee for your peace of mind.

Installation made easy

Ultra Thermostatic Shower Valves contain the patented Valquest cartridge – which makes them simple to install and easy to maintain after installation.

- **The cartridge is fully reversible, meaning if hot and cold supplies are the wrong way round, it doesn't need re-plumbing. Simply remove the cartridge, turn 180° and replace**
- The patented cartridge is highly resistant to calcium build-up - even in hard water areas
- Full thermal protection to prevent scalding even in the event of hot or cold water failure
- Thermostatic control to +/- 1 degree even if the temperature or incoming pressures fluctuate

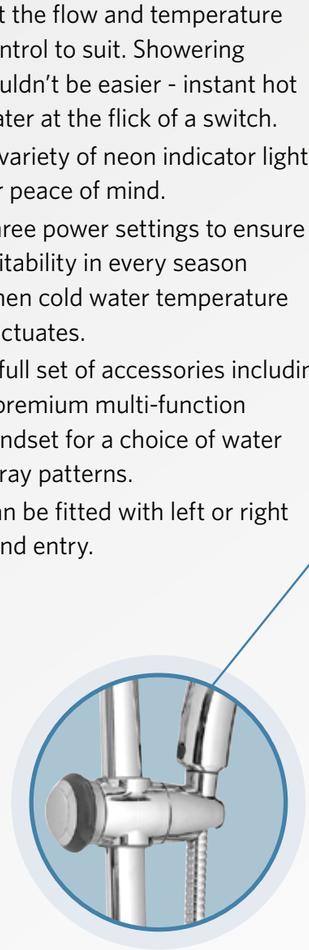
Electric Showers

2 TWO YEAR GUARANTEE

Why Choose an Electric Shower?

- The convenience of an on/off button; after installation simply set the flow and temperature control to suit. Showering couldn't be easier - instant hot water at the flick of a switch.
- A variety of neon indicator lights for peace of mind.
- Three power settings to ensure suitability in every season when cold water temperature fluctuates.
- A full set of accessories including a premium multi-function handset for a choice of water spray patterns.
- Can be fitted with left or right hand entry.



Adjustable height to suit all the family.

Three power settings to ensure suitability in every season.

TMV3
Approved Showers

12 TWELVE MONTH GUARANTEE

Our TMV3 approved shower valves combine great style, thermostatic control and a choice of easy-to-use handles making them the perfect shower solution for a range of specification projects.

TMV3 valves are engineered to a high standard so that they meet Government Health and Safety requirements for use in public places such as schools, hospitals, offices etc. and would significantly reduce the risk of scalds occurring in the home or anywhere that hot water is delivered through mixing valves.

- Sequential control shower valve for combined control of temperature and flow
- Suitable for use with unvented supplies, combi boilers, gravity and mains pressure systems
- Single-piece thermal cartridge technology
- Factory set at 43ºC to prevent scalding
- Temperature stability of +/-2ºC
- Fail-safe on hot and cold supplies
- Operating pressure range of 0.1 to 10 bar
- WRAS approved
